

STOMP OUT THE FLU BUG WITH OUR CORPORATE FLU SHOT PROGRAM

Each year the flu is responsible for nearly \$3 million in lost work days. Discover a flexible, convenient way to reduce your losses in production and revenue.

The Community Healthcare System Corporate Flu Shot Program quickly and efficiently vaccinates employees at their work place. Immunizations can be scheduled throughout October and November. The seasonal flu vaccine* can be given to a large number of employees in a relatively short period of time. We offer flexible hours to cover all shifts.

*The seasonal flu vaccine protects against three influenza viruses that research indicates will be most common during the upcoming season. The 2010-2011 flu vaccine will protect against 2009 H1N1, and two other influenza viruses (an H3N2 virus and an influenza B virus). The viruses in the vaccine change each year based on international surveillance and scientists' estimations about which types and strains of viruses will circulate in a given year.

**Minimum 15 people for on-site service or \$35 on-site fee.

Supplies are limited.

To schedule your immunizations please call Julie Edgerton at 219-759-4604.
